Professional Summary

Adobe Experience Manager (AEM) professional with 6+ years of experience across Enterprise Content Management (ECM), website migration, web development, e-commerce solutions, and cloud hosting. Proven track record delivering enterprise-scale CMS migrations to Adobe Experience Manager, encompassing content authoring, Digital Asset Management (DAM), Content Fragments, Editable Templates, Multi Site Manager (MSM), Launches, Workflows, and Translation Projects. Currently expanding into AEM Development — HTL (Sightly), Sling Models, OSGi, Maven, Java, Core Components, and Dispatcher. Skilled in responsive web development, CMS implementation, cloud deployment, and Linux server administration.

Professional Experience

Senior Analyst (Adobe Experience Manager)

Aug 2021 – Present

eClerx Services Ltd.

- The migration of enterprise websites from **OpenText CMS** to **Adobe Experience Manager (AEM)**, recreating and validating web pages to preserve business-critical content integrity.
- Authored and rebuilt web pages in AEM based on legacy CMS content, ensuring full content parity between source and destination platforms.
- Conducted end-to-end content audits before and after migration, identifying and resolving discrepancies to maintain accuracy and quality standards.
- Validated migrated content against source systems, reducing post-migration defects through rigorous quality checks.
- Authored, reviewed, and published website content to Production, maintaining a zero-defect release record across multiple release cycles.
- Managed Digital Asset Management (DAM) repositories and built structured, reusable content using Content Fragments and Editable Templates.
- Administered Multi Site Manager (MSM) to synchronize content across a multi-site architecture, and coordinated website Launches with minimal downtime.
- Managed AEM Workflows to streamline content approval, and supported Translation Projects for multilingual content delivery.
- Applied content Tags and used CRX/DE (view-only) to improve content discoverability and verify repository integrity during troubleshooting.
- Partnered with business stakeholders and coordinated cross-functional delivery using Workfront, Wrike.

Web Developer

Jun 2020 – Aug 2021

Ira Digital Services (Digital Tokri)

- Developed responsive, cross-browser business websites using HTML5, CSS3, JavaScript, Bootstrap, and jQuery.
- Designed and customized WordPress websites for a diverse portfolio of business clients, improving site usability and performance.
- Built WooCommerce-based e-commerce websites and customized Shopify stores tailored to client branding and product catalogs.
- Configured and managed AWS EC2 instances and DigitalOcean Linux servers for scalable, secure website hosting.
- Installed SSL certificates, configured domain DNS records, and managed cPanel hosting and business email setup end-to-end.
- Deployed, maintained, and troubleshooted production websites, delivering ongoing technical support and minimizing downtime.
